Classroom News

This month we will be discussing and learning about the various animals that can be found in the jungle. We will be learning the names and the special features of the favorite animals (i.e. how many legs does a tiger have? What colour is an elephant?) and the noises they make, so be prepared for some roaring! We will also study the various types of animals noting their similarities and differences (i.e. Which animal has a pattern? Which animal is taller?).
